

ABS SCHOLARSHIP PROGRAM

A COMMITMENT TO EDUCATION

Consistent with its role as a leader in marine technology and its position within the maritime industry, ABS is committed to supporting maritime education through a global scholarship program. Scholarships are awarded to deserving engineering and naval architecture students at universities that are recognized as national or international leaders in maritime technical education and research.

ABS – AN OVERVIEW

ABS is one of the world's largest and most respected international Classification societies. It is headquartered in Houston, Texas and operates through a global divisional structure that oversees its activities through offices in more than 60 countries. Divisional headquarters are maintained in London, Singapore and Houston. Regional headquarters are maintained in Busan (South Korea), Hong Kong, Rio de Janeiro, Doha (Qatar), Piraeus (Greece) and in the New York area.

The ABS Mission is to promote the security of life, property and the marine environment, primarily through the establishment and verification of technical and engineering standards (Rules) for the design, construction and operational maintenance of ships and marine-related facilities.

ABS also acts as a Recognized Organization on behalf of more than 100 national governments. In this capacity ABS may conduct statutory surveys and inspections on behalf of the flag State in which the ship is registered and issue the relevant certificates.

ABS is a not-for-profit organization that has no capital stock and pays no dividends. All funds generated from fees for classification services are used solely for the performance of these services, and any surplus is used for the extension and improvement of ABS services, including research and development. A wholly owned affiliate, ABS Group of Companies, Inc. is the holding company for several for profit subsidiaries that provide risk management, management systems and marine fleet software services.

The true strength of ABS lies with its employees. Our engineers, surveyors, researchers and support staff represent a remarkable breadth of technical knowledge, experience and talent. ABS provides a career for employees – not just a job. Our employees have the opportunity to diversify their skills and experience across multiple disciplines in the differing marine sectors, including offshore oil and gas. And ABS values education and professional development by supporting employees through an aggressive program of continuous training, either at the in-house ABS Academy or by supporting staff members as they pursue additional academic and professional qualifications.

As a company, ABS is an Equal Opportunity Employer and offers an outstanding benefit and retirement package as well as competitive compensation. Please visit our website at www.eagle.org for more information about ABS and its affiliated companies or contact us directly at scholarships@eagle.org for specific information regarding the scholarships that are offered. The ABS Corporate and Americas Division Headquarters are located at:

ABS Plaza
16855 Northchase Drive
Houston, TX 77060 USA
